Summary — Final-year CSE student and Full Stack Developer with 10 months of MERN stack experience, building scalable, responsive web applications and working on real-world projects.

Experience

GraffersID

March 2026 – June 2026

Full Stack Developer Intern

- Maintained and **optimized a production dashboard**, improving performance and user experience.
- Integrated **AI STT/TTS pipelines using ElevenLabs and Sarvam AI** for voice interactions.
- Reduced system **latency by ~25%** through real-time optimization.
- Automated **workflows using Zapier**, reducing manual **effort by ~30%**.
- Optimized **database queries**, reducing **server load by ~30%** and improving response time.

Itonic Labs

Aug 2024 – March 2025

Full Stack Developer Intern

- Developed and maintained frontend applications using **React.js** and **Next.js** ensuring a responsive and user-friendly UI.
- Integrated **RESTful APIs** with **MongoDB** and **Express.js**, improving data flow and synchronization by **30%**.
- Improved **Git workflows**, enhancing collaboration and **reducing merge conflicts by 30%**, boosting project efficiency.
- Contributed to **agile development cycles**, sprints through planning, code reviews, and timely **feature delivery**.
- Developed **scalable web applications** with a focus on clean code, and **user experience** across the full stack.

Education

SAGE University Bhopal

2022 – 2026

Bachelor of Technology in Computer Science Engineering

CGPA – 8.6

Skills

Frontend: HTML, CSS, TypeScript, React.js, Next.js, Angular

Backend: Node.js, NestJS, Express.js, MongoDB, Websocket, MySQL, JavaScript

Languages: C, C++, Java, Python

Tools: Git, Github Actions, Docker, Zapier, Prometheus, Grafana

Projects

Atreum Hospital

[Link](#)

React.js, Javascript, Tailwind CSS, RESTful API, ImageKit, NodeJS

- Developed and deployed a **full-stack healthcare platform** using MERN stack with a responsive UI.
- Built SEO-optimized landing pages, increasing search visibility and user **engagement by ~25%**.
- Optimized performance by **reducing page load time by ~20%** through asset and frontend optimization.

Cloth2Cash – Sustainable Fashion Recycling Platform

[Link](#)

React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT Auth

- Developed a platform where users can **schedule a pickup** for their old clothes **directly from home**; users get paid per kg based on clothing weight. products.
- Built a clean, responsive **UI for booking pickups, tracking status, and viewing earnings**, while integrating secure REST APIs for order management.
- Implemented secure **JWT-based authentication** for user login, protected routes, and safe access to pickup and earnings data.

EduQuiz

[Link](#)

React.js, Node Js, MongoDB, Tailwind CSS, Express.js, JWT Auth

- Built an interactive quiz platform using MERN, **enabling real-time question delivery, scoring, and authentication**.
- Integrated user **leaderboard, performance tracking, and subject-wise quiz categorization** to boost engagement and competitive learning.
- Implemented secure login with **role-based access** for admins and users, along with **responsive UI/UX** for seamless experience across devices.

Certifications

- **Advanced MERN Development**–INFOSYS. March 2025. [Credential]
- **Search Engine Optimization (SEO)** –Coursera University of California, Davis. Feb 2025. [Credential]
- **Introduction to Generative AI** –INFOSYS March 2025. [Credential]
- **Introduction to Software Engineering**–Coursera IBM March 2025. [Credential]

Achievements

- 2nd place – **Bhopal Inter-college Ideathon** for a clothes-to-cash startup promoting reuse and employment - [\[Credential\]](#)
- Tracked and **showcased coding progress** across LeetCode, GFG, CodeChef, and HackerRank using Codolio - [\[Credential\]](#)
